

AS OF OCTOBER 2023

Customs document EUR1/ approved exporter/ registered exporter

| Category: Customs information

Dear customers,

all EU preferential measures allow EU exporters to issue preferential proofs themselves without value limits and without the involvement of the customs authority.

HEROSE GmbH issue this declaration on the invoice.

Only goods that are covered by the respective preferential arrangement of the agreement countries and fulfil the conditions set out therein (rules of origin) are eligible for preference.

If the conditions for fulfilment are not met, the declaration on the invoice is not applicable.

The articles are marked separately on the invoice.

Depending on the preferential measure, this self-certification requires an authorization as "Approved Exporter" (Herose registration Number **DE/ 6200 / EA /1065**) or a registration as "Registered Exporter - REX" (Herose registration Number **DEREX62000088**) The authorization and/or registration is carried out by the customs authority upon application of the exporter. The internal organization is regularly reviewed by the customs.

The normally required movement certificate EUR.1 or EUR-MED is thereby omitted.
